

DBA Curriculum Overview

A practical overview of the common DBA learning journey. Final modules and assessment structure are confirmed with the selected partner institution.

Indicative DBA learning structure

Stage	Focus Area	Purpose
Stage 1	Doctoral orientation and executive research positioning	Clarify research interests, leadership context and suitable pathway options.
Stage 2	Research methodology and proposal development	Build qualitative, quantitative or mixed-method research foundations.
Stage 3	Strategic leadership and global business analysis	Apply scholarly frameworks to business strategy, governance and transformation.
Stage 4	Applied specialization and field research	Connect research design to the candidate's industry, organization or market problem.
Stage 5	Dissertation or applied doctoral project	Produce, refine and defend an original business research contribution.

Typical research capability areas

- Problem formulation and doctoral research question design.
- Qualitative, quantitative or mixed-method research planning.
- Strategic leadership, governance, innovation and transformation analysis.
- Ethical research practice, academic writing and dissertation defense preparation.
- Applied business contribution connected to a live professional or market challenge.

Important note

This curriculum overview is an indicative LearnifyOps pathway guide. Official university curriculum, module names, credit weighting, assessment method and award requirements must be verified for the selected institution during profile review.
